

EdmondMarks
TECHNOLOGIES

Electronic Manufacturing Services

*Defect Free Products and
Solutions On Time*

In today's fast-paced business environment, accurate and expedient solutions are crucial.

EdmondMarks Technologies offers a fresh approach to electronics manufacturing outsourcing, specializing in New Product Introduction (NPI), low-medium volume high mix production, and a full suite of support services.

SERVICES

We offer a flexible manufacturing solution that has been designed to support quick set up and improved deliveries while maintaining a policy of unyielding accuracy.

- **Contract Manufacturing:**
Mixed technology Assemblies
0201/0402
Micro BGA / LGA
Flip Chip
BGA rework and reballing
Extensive RoHS/Lead free experience
- **Production Engineering**
- **Printed Circuit Layout**
- **IPC Training and Certification (CIS)**
- **RoHS Consulting/ Conversions**

LEAD FREE MANUFACTURING

Claiming to offer lead free services is easy. Having equipment that operates at the right temperature is a simple matter of purchasing. However, understanding the potential problems in the various processes is a matter of training and experience. We have both. Achieving reliable lead free assemblies presents challenges, requires attention to detail and tight process controls. Improper component handling and processing can lead to internal cracks in processors, delamination, bond damage, and other failures that may not be seen.

PHILOSOPHY

It is our philosophy, our mission, to provide the highest level of services with a focus on customer service and quality. Our project management professionals will insure timely delivery and superior communication. Customers receive professional service from start to finish.

QUALITY SYSTEMS

We have created an innovative quality system having combined initiatives of Lean Six Sigma with the ISO 9000 standards, which promotes an unyielding pursuit of excellence while

working to continually monitor and maintain our quality standards. We are committed to exceeding the expectations of our customers, achieving total customer satisfaction and providing defect free services on time.

Our project management professionals will insure control, communication and quality by implementing our tightly integrated quality and business systems.

Exceeding Customer expectations providing defect free products and services on time!
